The study

- Qualtrics and SPSS
- 5 units
- 1 day
- 152 variables
- 87 responses
- 13,224 data points

Caveats

- Only one day
- Population is fluid
- Human error
- Methodology... what is missing?
- Lacks the voice of young people

The outcomes of secure care in Scotland

Introduction

Now I think that I did need to be in secure, to stop me getting into trouble, but I didn't think that then (Young person).

This paper describes the findings of a three year study (November 2002 – 2005) aimed at developing an understanding of the use and effectiveness of secure accommodation in Scotland (Walker et al., 2006). The study was funded by the Scottish Executive.

SECURE ACCOMMODATION STATISTICS 2006-07

13 September 2007

A National Statistics Publication for Scotland

This publication presents statistics on secure accommodation in Scotland. Headline messages are:

- During 2006-07 a new secure unit opened (Good Shepherd), providing an additional 18 secure places. Therefore at 31st March 2007 six secure units provided a total of 112 secure places, not including emergency beds.
- There was an average of 94 residents in secure accommodation throughout 2006-07, up from 81 in 2005-06.
- The average cost per bed per week was £4,400, ranging from £4,000 to £4,900. The estimated annual cost for secure accommodation in Scotland, based on usage, was £22.0 million in 2006-07, a 36 per cent increase from the previous year in real terms.
- Forty four per cent of all young people admitted to secure accommodation during 2006-07 were 15 years old.
- On the 31st March 2007, there were 596 staff working across the secure estate, of which 15 were temporary. There were 18 vacancies, of which seven had been vacant for more than three months.
